

# MID-ATLANTIC GREENS

## Welcome to Rotation Nation

Because the future of our industry depends on the efficacy of our products, we've established Rotation Nation. PBI-Gordon has developed fungicide rotation programs to meet the specific needs of each region, while managing resistance by enlisting a variety of products and active ingredients, including the proven performers in our fungicide line:

- ★ **Kabuto® Fungicide SC**  
Excellent control of dollar spot and Spring dead spot!
- ★ **Segway® Fungicide SC**  
Proven protection against Pythium disease.
- ★ **Tekken™ Broad Spectrum Fungicide**  
One application rate controls 21 diseases for up to 28 days.

***No matter what region you're in, PBI-Gordon fungicides are formulated to play a powerful role in your rotation program.***

Disease management concerns in the Mid-Atlantic vary drastically based on location and turf species. Bentgrass management focuses on the control of dollar spot, brown patch, Pythium diseases, Summer patch, and general summer stress. Anthracnose is a threat to *Poa annua* putting greens in the northern parts of the Mid-Atlantic, while bermudagrass in this region is at risk of leaf spot, Pythium diseases, and Spring dead spot.

Although not included in the spray program for the mid-Atlantic, warm-season turfgrass species in this region may necessitate fall applications for the prevention of Spring dead spot and large patch.
